"The bloody events in Kiev are linked to the intervention of the EU and the USA in the developments in Ukraine, are the result of the fierce competition of these powers with Russia over the control of the markets, raw materials and the country's transport network. (LAMP 2014)

From this standpoint, the interventions of the EU and the USA in favour of the demonstrators of the opposition, who are allegedly fighting for "freedom" and "democracy", for the accession of Ukraine to the EU, are extremely hypocritical. In reality, the EU and the USA support and utilize even armed fascist forces, which are active inside the Ukrainian opposition in order to promote their geopolitical goals in the Eurasia region.
