U.S. death-ray bomb

A L E R T

A L E R T

Dear Friend:

The U.S. is about to begin production of the Death Ray Bomb, a nuclear weapon designed to kill people by the release of neutrons, while preserving property. The heavy dose of neutrons attacks the central nervous system and death is certain in a few hours. The Pentagon is also ready to produce neutron artillery shells for the U.S. forces in Europe and for the NATO Allies. The money for the production of these neutron warheads is contained not in the military budget, but in the \$10.2 billion Public Works Bill of the Energy, Research and Development Administration. PRESIDENT CARTER SHOULD BE TOLD THAT HUMAN RIGHTS HAS A DIRECT RELATIONSHIP TO WEAPONS DESIGNED TO KILL PEOPLE. PEOPLE MUST HAVE THE HUMAN RIGHT OF SURVIVAL.

SALT II Talks

The hawks in the Administration who are influencing Carter, are making every effort to cause friction and so-called 'trouble spots' between the U.S. and the Soviet Union and to poison the atmosphere of detente, in order to wreck the SALT II talks. President Carter must be told that the SALT II talks should be convened as soon as possible in order to halt the arms build-up and work toward peaceful solution of conflicts.

Enclosed is a draft of a letter which can also be used as the basis of a mailgram. It can be folded, stapled, addressed to President Carter and sent as first class mail.

Summer is the time to wire and write to Carter, to Congresspeople, to send letters to editors, to continue action to slash the military budget before October 1st-beginning of the 1978 fiscal year.

Yours for Peace & Justice,

Council Steering Committee

P.S.— Hold the Date: Aug. 6
(Hiroshima Day) for a meeting
on peace in Staten Island.
